

Four explorers climbed different mountains in different years. Each one spent several days to achieve such triumph. Figure out which mountain was explored by Nicholas.

- The explorer who needed 10 days to climb a mountain was either the explorer who climbed Everest or the explorer who climbed in 1970.
- The 1970 climbing took longer than the 1990 climbing.
- Of the explorer Ludwig and the explorer Otto, one climbed in 1990 and the other climbed Kilimanjaro.
- Aconcagua needed 5 more days to be climbed than the mountain climbed in 1970.
- The mountain climbed in 1980 needed 5 more days to be climbed than the mountain climbed by Otto.
- Everest was either climbed by Edmund or climbed in 1980.
- The mountain climbed in 1990 needed 5 fewer days than the mountain climbed by Edmund.

		Days				Year				Explorer
