

- Four expert hackers discovered how to block the newest computer threats. Can you tell which virus was neutralized last?
- 1. Exactly one of the viruses has the same initial in its name and system's name it works on.
 - 2. Climax didn't neutralize the virus for Ubuntu, nor the Upsideown.
 - 3. Jellyfish blocked a virus one month after Superly did.
 - 4. The virus for Fedora, which wasn't the Overclock, wasn't stopped in November.
 - 5. Among the systems Ubuntu and Debian, one's virus was stopped in September, the other was called Daydream.
 - 6. Superly didn't neutralize the Follower. Jellyfish didn't block Upsideown.
 - 7. Prodigy didn't stop a virus for Ubuntu nor Windows.
 - 8. The Follower was neutralized two months before the virus was stopped by Jellyfish.
 - 9. The Overclock infected Windows or it was blocked by Superly.
