

Try to solve this logic problem to figure out how much each electric vehicle has charged.

- The German car has 30K miles.
- The car with 20K miles is from the Japanese manufacturer or it charged \$1.5.
- The French car has less miles than the Italian car.
- The vehicle that charged \$3.0 has 10K more mileage than the Italian car.
- The car that charged \$4.5 has 20K less mileage than the German car.

		Mileage				Cost			
		10K	20K	30K	40K	\$1.5	\$3.0	\$4.5	\$6.0
Manufacturers	French								
	German								
	Italian								
	Japanese								
Cost	\$1.5								
	\$3.0								
	\$4.5								
	\$6.0								

	Mileage	Cost
French		
German		
Italian		
Japanese
