

## A Choice of University - Logic Grid

Four students, from different countries, chose to study in the United Kingdom. Each one chose a subject and a city (where the university is situated). Find out the nationality of the history student.

1. Exactly one boy and one girl chose a university in a city with the same initial of their names.
2. A boy is from Australia, the other studies Architecture.
3. A girl goes to Cambridge, the other studies Medicine.
4. Oliver studies Law or is from USA. He is not from South Africa.
5. The student from Canada is either a historian or will go to Oxford.
6. The student from USA will go to Edinburgh or will study Medicine.
7. Lucas is not from USA and will not study History.
8. The student from South Africa is going to Edinburgh or will study Law.
9. The Canadian is not studying Law.

		City				Country				Subject			
		Cambridge	Edinburgh	London	Oxford	Australia	Canada	South Africa	USA	architecture	history	law	medicine
