

Four explorers climbed different mountains in different years. Which mountain did Nicholas climb?

- The explorer who needed 10 days to climb a mountain was either the explorer who climbed Everest or the explorer who climbed in 1970.
- The 1970 climbing took longer than the 1990 climbing.
- Of the explorer Ludwig and the explorer Otto, one climbed in 1990 and the other climbed Kilimanjaro.
- Aconcagua needed 5 more days to be climbed than the mountain climbed in 1970.
- The mountain climbed in 1980 needed 5 more days to be climbed than the mountain climbed by Otto.
- Everest was either climbed by Edmund or climbed in 1980.
- The mountain climbed in 1990 needed 5 fewer days than the mountain climbed by Edmund.

		Days				Year				Explorer			
		5	10	15	20	1970	1980	1990	2000	Edmund	Ludwig	Nicholas	Otto
Mountain	Aconcagua												
	Everest												
	Kilimanjaro												
	Vinson												
Explorer	Edmund												
	Ludwig												
	Nicholas												
	Otto												
Year	1970												
	1980												
	1990												
	2000												

		Days		Year		Explorer	
	Aconcagua						
	Everest						
	Kilimanjaro						
	Vinson
