

Beer Mugs - Logic Grid

Franklin, who loves beer, went to Germany to complete his collection of beer mugs. In each city he visited, he bought one mug, and decided to only use that mug to a specific beer type. How big is the mug he bought in Dortmund?

1. The mug for dark beer holds twice as much as the red mug.
2. Exactly one of the beer types has the same initial as the city its mug was bought in.
3. The white mug holds 50 cl or was bought in Dortmund.
4. The mug for creamy beer is exactly one size larger than the mug from Essen.
5. The black mug isn't meant for amber beer, and isn't from Aachen.
6. The gray mug holds brown beer or is the biggest. However, it wasn't bought in Dortmund.
7. The red mug is from Aachen or Dortmund. The black mug is smaller than the gray one.
8. The mug from Berlin is exactly one size larger than the red mug.
9. The mug for creamy beer doesn't hold 50 cl.

		Size				City				Color			
		33 cl	50 cl	66 cl	100 cl	Aachen	Berlin	Dortmund	Essen	black	gray	red	white
