

Four baseball players are playing together now but played on different teams last season. Figure out which was each one's team.

- Exactly one player played in the city with the same initial of his name.
- Charles didn't play in Atlanta, and he doesn't bear number 17.
- The number of the player in the 2nd base is smaller than Diego's but bigger than the player from Cincinnati.
- In counter-clockwise order there are: Albert, number 66, Charles, and the player from Detroit.
- Number 66 either played in Atlanta or is in the 1st base.
- If Bob played in Boston, then the player from Cincinnati is in the 3rd base.
- Number 17 is in the 1st or 2nd base.
- If the player from Boston is at home base, Charles has number 81.
- Players from Atlanta and Detroit are on opposite positions. Neither of them is number 6.
- If Bob is in the 3rd base, then number 66 is at home base.
- If Albert is in the 1st base, then he is number 6.

		Number				Team				Position			
		6	17	66	81	Atlanta	Boston	Cincinnati	Detroit	home base	1st base	2nd base	3rd base
Player	Albert												
	Bob												
	Charles												
	Diego												
Position	home base												
	1st base												
	2nd base												
	3rd base												
Team	Atlanta												
	Boston												
	Cincinnati												
	Detroit												

		Number	Team	Position
Albert				
Bob				
Charles				
Diego
