

Four friends spent the night playing Risk. Each one of them has the objective to wipe out an enemy army. Can you tell which player conquered more territories?

- Each player must destroy an army of a different color.
- No pair of players are mutual enemies.
- Chad has one territory more than the player in charge of the green army. Chad's target isn't red.
- The purple player must destroy the red or black player.
- The black player has 2 more territories than Benson.
- Tyler has 2 fewer territories than his enemy.
- Logan either is black or must destroy the black army.
- The player with 10 territories is controlling the green or purple army. His objective isn't the red army.
- The player aiming to destroy Logan has the red army.

		Army				Enemy				Owned territories
